

SPORT MEDIA.TV

Sportmedia.tv

is based on an internet platform of a new type that is capable of simultaneous streaming of unlimited number of events and can support up to 50 000 viewers without crashing. The concept of Sportmedia.tv is to stream only live events and the targeted group is actually the whole world thanks to the infrastructure we built. Sportmedia.tv streams events in three ways: own production shot with SNG; foreign production with paid copyright for live streaming; and re-streaming of TV channels with contract for consigning non-exclusive license for broadcasting a TV channel. Before launching each TV product the viewer can watch a TV commercial. Sportmedia.tv is capable of giving a streaming channel. The platform works in tight co-operation with the other websites in the group. Sportmedia.tv is a reasonable partner for every fan of sports betting and this turns the media for a suitable advertising field for all bookmakers that offer sports bids. Sportmedia.tv offers and guarantees highly specialized audience to its advertisers. Sportmedia.tv is partner of all sports federations which competitions and events are streamed. Most of the events are streamed live only by this platform which is a pre-requisition for being unique and building trust.
